

Série de certificação GCP: 3.6

Implantando uma solução usando o Cloud Launcher

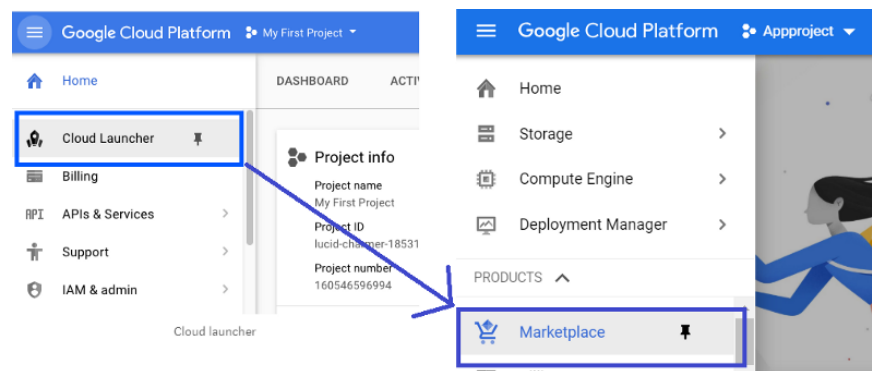

Prashanta Paudel

26 de outubro de 2018 · 3 minutos de leitura

O Cloud Launcher é um local para selecionar e implementar uma solução pré-criada a partir do pacote já disponível no Google Cloud Platform.

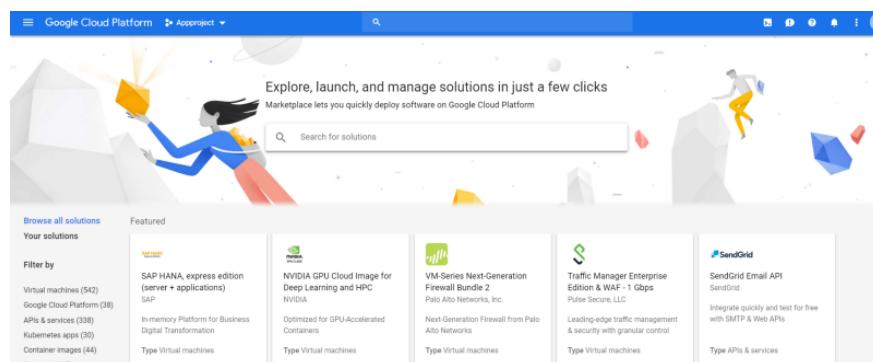

Dessa forma, o Google cobrará o uso da licença do software com o faturamento do GCP.

O GCP o renomeou para o Marketplace há alguns meses. Agora você pode encontrar a mesma coisa no Marketplace.

Lançador para o Marketplace

O mercado tem centenas de soluções pré-construídas onde você pode encontrar o que deseja pesquisando diretamente na página principal ou selecionando a partir do filtro.

Marketplace

A lista mais recente contém software nas seguintes categorias

Softwares

Além disso, você também pode iniciar os serviços do GCP no Marketplace.

Soluções de GCP no mercado

Um outro benefício do Marketplace é que você pode ver quanto vai custar na página de detalhes do software

WordPress
[WordPress \(Google Click to Deploy\)](#)
 Estimated costs: \$24.67/month | 1,000+ recent deployments
 Web publishing platform for building multiple blogs and websites

Terms of Service

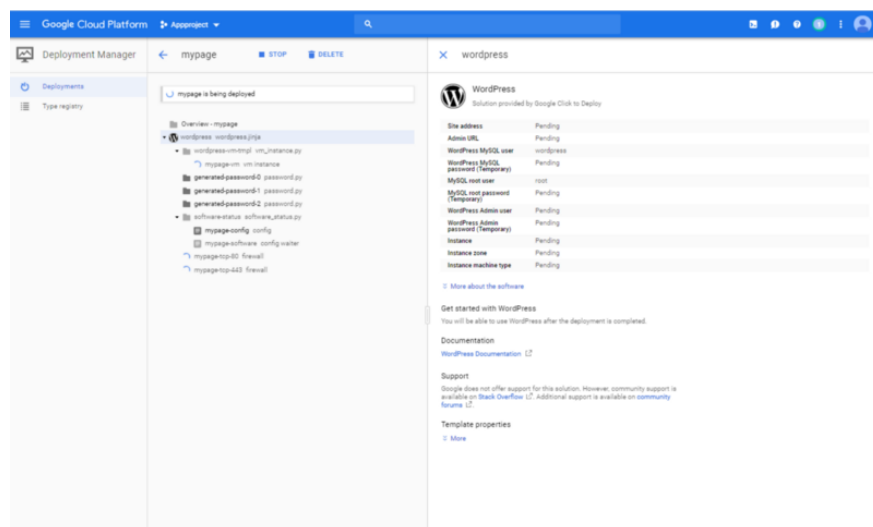

The software or service you are about to use is not a Google product. By deploying the software or accessing the service you are agreeing to comply with the GCP Marketplace terms of service and the terms of any third party software licenses related to the software or service. Please review these licenses carefully for details about any obligations you may have related to the software or services. To the limited extent an open source software license related to the software or service expressly supersedes the GCP Marketplace Terms of Service, that open source software license governs your use of that software or service.

By using this product, you understand that certain account and usage information may be shared with Google Click to Deploy for the purposes of sales attribution, performance analysis, and support.

Google is providing this software or service "as-is" and will not perform any ongoing maintenance. Ongoing upgrades and maintenance are your responsibility.

Desdobramento, desenvolvimento

Depois de acessar o Deploy, você será redirecionado para o Deployment Manager

Gerente de Implantação

Após alguns instantes, você obterá todas as informações de acesso e senhas na página do Deployment Manager.

Suggested next steps

- Access the phpMyAdmin web interface
[REDACTED]
- Change the temporary passwords
For additional security, it is recommended that you change the passwords.
- Assign a static external IP address to your VM instance
An ephemeral external IP address has been assigned to the VM instance. If you require a static external IP address, you may promote the address to static. [Learn more](#) [↗](#)
